0. Dossier Overview & Legal Notice

Issued by: NailLegend · naillegend.com | **Contact:** Lareina | **Product:** Hand & Foot Mask **Document:** Compliance & Technical Dossier — Overview | **Issue date:** 2026-06-22 | **Version:** 1.0

What this dossier is

This is the **Compliance & Technical Dossier** for the NailLegend **Hand & Foot Mask** category (moisturizing / exfoliating / peeling lines; bootie–glove sheet and cream–balm forms). It brings together, in one document, the technical and regulatory information a brand-owner or distributor needs when sourcing this product on an OEM / Private-Label basis for the **US (FDA)** and **EU (Regulation EC 1223/2009)** markets.

The data in this dossier are **representative of NailLegend's standard production** for this category. They are typical values issued by NailLegend's in-house quality function. For a specific order, the figures are reconfirmed against the **final agreed formula and production batch**, and batch-specific certificates of analysis are issued with shipment.

Regulatory responsibility

Final market-placement responsibility — FDA cosmetic listing (MoCRA), EU CPNP notification, appointment of the EU Responsible Person, the Cosmetic Product Safety Report (CPSR), the Product Information File (PIF), and final labelling and claims — rests with the **brand owner / importer**. NailLegend, as the manufacturer, supplies the supporting technical documents in this dossier to enable that work.

Claims guardrails

A hand & foot mask claiming **moisturizing, softening, smoothing, dead-skin / callus removal** is a **cosmetic**. Wording such as "*cures athlete's foot*," "*treats*," or "*medical*" reclassifies the product as a **drug** and triggers separate regulation. Keep claims cosmetic — "*helps remove dead skin / softens calluses / intensely moisturizes*," not "*cures / treats*."

How to read the data

- **Composition & specification** (INCI, TDS, formulation disclosure, allergen and IFRA statements) describe the product as manufactured.
- **Test sections** (preservative-efficacy, microbiological, stability, pH & acid concentration) present the applicable **methods, acceptance criteria, and typical results** for this product, issued by NailLegend's in-house QC. They represent standard production performance; batch-specific certificates accompany each shipment.

Applies to the **exfoliating and peeling** (acid-containing) lines. Free-acid concentration and pH drive both efficacy and irritation and underpin market compliance (US AHA sun-sensitivity warning; EU AHA concentration/pH labelling). Values are **typical of NailLegend standard production**, issued by NailLegend in-house QC; batch-specific values are confirmed per production. Specific permitted limits are verified against current target-market regulations for each order.

1. pH (by line)

Line	pH (as is, 25 °C)	Method
Moisturizing	5.0 – 6.0	pH meter, ISO 4316
Exfoliating	3.5 – 4.0	pH meter, ISO 4316
Peeling	3.0 – 3.6	pH meter, ISO 4316

2. Acid identity & concentration (typical – exfoliating line)

Acid	Type	CAS	Total conc.	Free acid	Method
Glycolic Acid	AHA	79-14-1	8.0%	~5.2%	Titration / HPLC
Lactic Acid	AHA	50-21-5	2.0%	~1.3%	Titration / HPLC
Salicylic Acid	BHA	69-72-7	1.0%	—	HPLC
Urea	Keratolytic	57-13-6	5.0%	—	—

(Peeling line uses a higher combined AHA/BHA load at lower pH for delayed shedding; exact figures confirmed per order.)

3. Compliance flags

Market	Requirement	This product
US	AHA products carry a sun-sensitivity warning ; concentration/pH within accepted consumer practice	Warning on pack; ≤ 10% AHA @ pH ≥ 3.5 (exfoliating)
EU	AHA concentration / pH labelling & restriction; confirm against current SCCS position per market	Within permitted range; verified per order
Peeling line	Recommended contact time is part of safe use and stated on pack	Contact time stated; do not exceed

4. Statement

Measured pH and free-acid values typical of standard production are recorded above. The brand owner's safety assessor uses these in the CPSR and to confirm labelling (including AHA warnings) for each target market; batch-specific values are provided with shipment.
